

BulkImport

BulkImport

BulkImport lets one team manage 130+ more sites monthly without extra staff. It automates setup, speeds deployment, and scales operations while keeping costs flat.

What BulkImport Does

BulkImport lets you onboard customers, sites, and devices at scale. Upload a filled Excel template and GCXONE creates everything automatically. No manual entry, no delays.

Why It Matters

5x Faster Onboarding

Onboard sites up to 5x faster with one-click import instead of manual entry.

Reduce Manual Work

Eliminate repetitive data entry and reduce the risk of setup errors.

Consistent Configurations

Ensure consistent configurations across every location from day one.

Focus on Monitoring

Stay focused on monitoring, not manual setup.

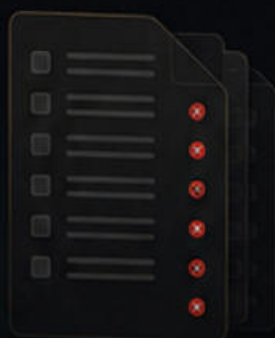

Immediate Deployment

New sites go live immediately after upload.

Before BulkImport

- ✗ Admins add entities one by one
- ✗ Large deployments take days
- ✗ Manual entry leads to inconsistencies

After BulkImport

- ✓ Upload once, and BulkImport handles the rest
- ✓ Large deployments complete in minutes
- ✓ Clean, consistent data across all locations

From manual and time-consuming to automated and reliable.

Key Capabilities

BulkImport supports the following entity types:

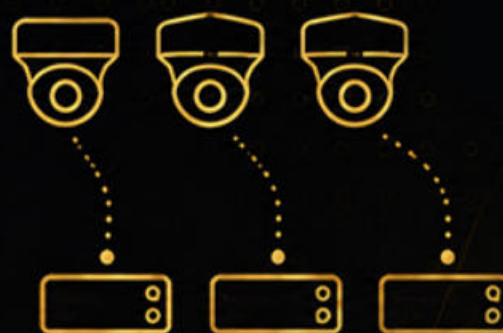

Multiple Sites

Multiple Customers

Multiple Devices

Configuration Path

BulkImport is available from the Configuration module.

One upload. Everything created.

BulkImport gives you the speed and consistency your operations demand.

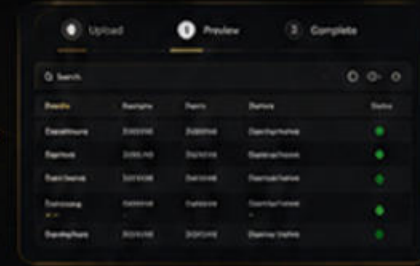

Use Cases

BulkImport is built for enterprise scale. Use it wherever speed, accuracy, and consistency matter.

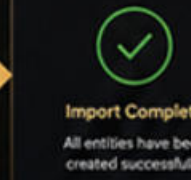

1 Upload

Download template, fill in your data, and upload your Excel file.

2 Preview

Review the data before confirming the import.

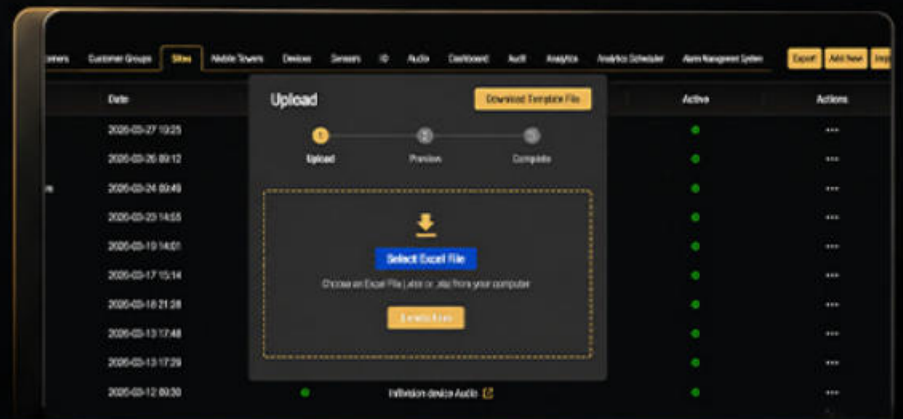

3 Complete

GCXONE imports the data and creates all entities instantly.

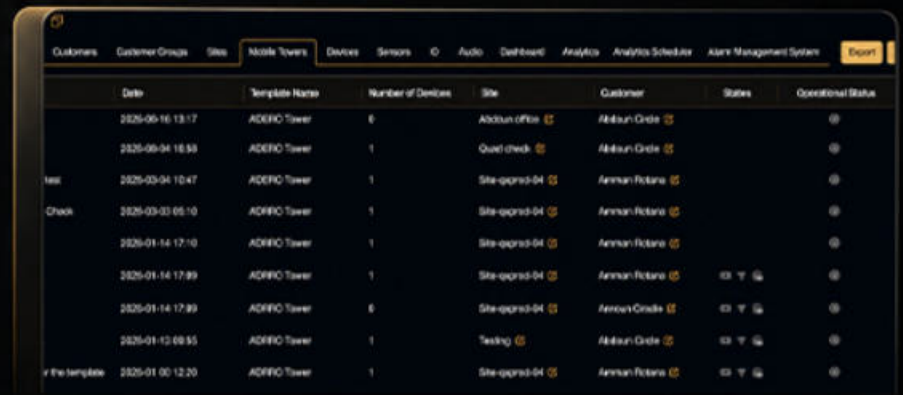

Large-Scale Onboarding

Configure hundreds of sites and devices in minutes and deploy GCXONE across multiple customers simultaneously.

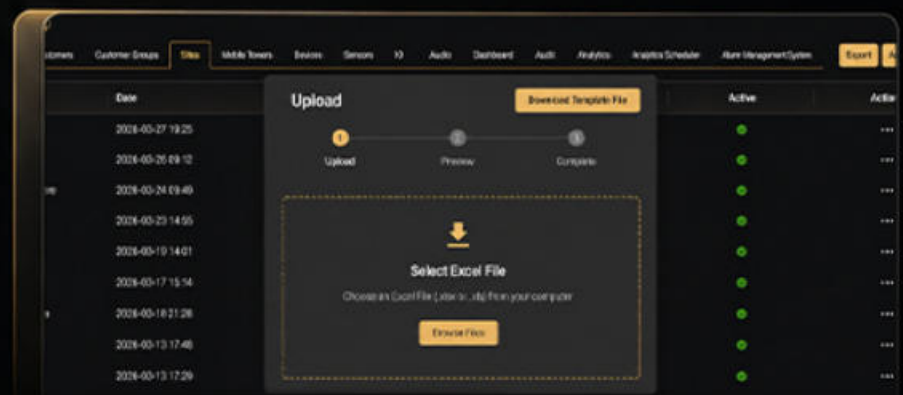

Multi-Site Deployments

Onboard complete customer environments, all sites and devices, in a single upload.

Standardized Configuration

Prepare one Excel template and import it across all environments to guarantee consistent configurations.
