

NXG

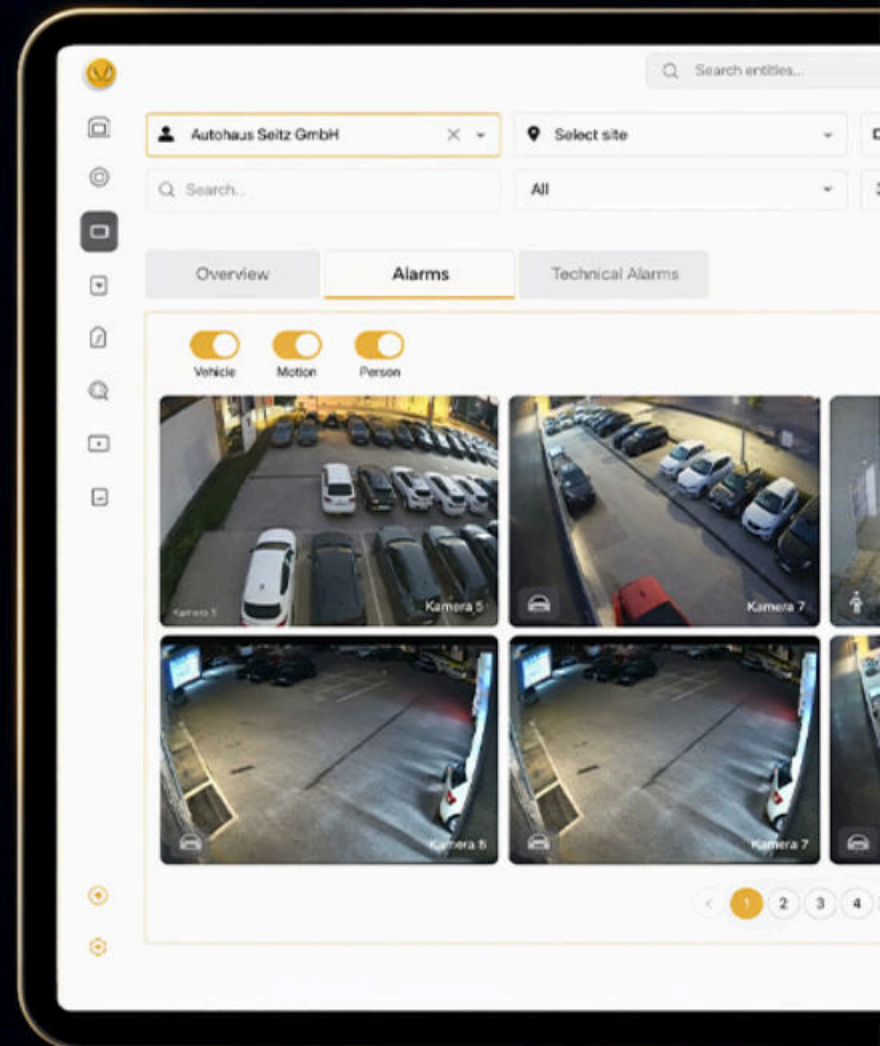

ZenMode

ZenMode

Group the alarms for operators to handle more alarms in the same time

Alarm Noise → Prioritized → True Alarms

! How it Was Before

- Endless alerts
- Repeated noise
- Operator fatigue
- Slow response

✓ With ZenMode

- Critical events first
- 3x faster triage
- 200+ more cameras
- 10% higher productivity

A Game Changer

3x

Faster
Alarm Triage

200+

Additional
Cameras
per Operator

10%

Higher
Productivity

No Extra
Operators
Required

ZenMode increases monitoring capacity without increasing headcount by helping operators focus only on the events that matter.

Streamline Response. Maximize Value.

ZenMode doesn't just improve speed, it drives real business impact. By enhancing operator efficiency, it unlocks up to €10,000 in monthly savings through smarter, faster alarm resolution.

Designed to reduce cognitive load and operational drag, ZenMode transforms high volume monitoring into a streamlined, high-performance process.

KEY FEATURES & BENEFITS

200+

More Cameras Managed
Without Fatigue

3x

Faster Alarm
Identification

2-3 Min

The Breakthrough

ZenMode ends alert overload. By filtering noise and surfacing only critical alarms, it creates calm, focused operators who respond faster, make fewer mistakes, and stay sharp through the shift.

How ZenMode Works With NOVA99x

NOVA99x detects and classifies events. ZenMode organizes and prioritizes these events into a single operational view, so operators can focus on what matters most.

HOW IT WORKS

NOVA99x
AI Detection & Classification

ZenMode
Event Organization & Prioritization

Operator
Review & Respond

KEY BENEFITS

AI-detected events from **NOVA99x**

Unified multi-site operational workspace

Rule-based event prioritization

Complete event context

Configurable operator workflows
