Legal disclaimer

This guide and its contents (the "Guide") are provided by NXGEN. All rights to the Guide and to the intellectual property embodied in it — including, without limitation, trademarks, trade names, logos and similar marks appearing in or on it — are protected by law. All right, title and interest in the Guide and in any related intellectual property rights belong to and remain with NXGEN and its licensors.

The Guide is provided free of charge, "as is" and for informational purposes only, without warranty of any kind. It is neither intended nor suitable to establish any legal relationship between the reader and NXGEN or its affiliates, including, without limitation, any obligation of NXGEN or its affiliates toward the reader.

The obligations of NXGEN and its affiliates in respect of NXGEN products or services purchased by a customer are governed exclusively by the terms of the agreement under which those products or services were purchased.

For clarification

The reader bears the entire risk as to the use, results and performance of the Guide. To the fullest extent permitted by applicable law, NXGEN disclaims and excludes all warranties, whether statutory, express or implied — including, without limitation, implied warranties of merchantability, fitness for a particular purpose, title and non-infringement of third-party rights — as well as any liability or warranty arising from suggestions, specifications or samples related to the Guide.

Surge

Updated 23 September 2026

Summary

GC Surge is a cloud-based alarm analytics platform that integrates with surveillance cameras via API, SMTP email, or FTP to ingest, process, and filter security events in real time. This space contains documentation for integrating cameras and devices with GC Surge using API, SMTP email, or FTP. Covers: Integration Guides.

Summary

GC Surge is a cloud-based alarm analytics platform that integrates with surveillance cameras via API, SMTP email, or FTP to ingest, process, and filter security events in real time.
