The Guide is provided free of charge, "as is" and for informational purposes only, without warranty of any kind. It is neither intended nor suitable to establish any legal relationship between the reader and NXGEN or its affiliates, including, without limitation, any obligation of NXGEN or its affiliates toward the reader.

The obligations of NXGEN and its affiliates in respect of NXGEN products or services purchased by a customer are governed exclusively by the terms of the agreement under which those products or services were purchased.

For clarification

The reader bears the entire risk as to the use, results and performance of the Guide. To the fullest extent permitted by applicable law, NXGEN disclaims and excludes all warranties, whether statutory, express or implied — including, without limitation, implied warranties of merchantability, fitness for a particular purpose, title and non-infringement of third-party rights — as well as any liability or warranty arising from suggestions, specifications or samples related to the Guide.

Picked Sites

Updated 8 October 2026

experience — not included in the PDF

Summary

Picked Sites is the number of distinct sites from which an Operator handled events during the selected period.

What it tells you

Higher values usually mean broader coverage across the operation. Consistently low values may mean an Operator is stuck on assigned sites or not participating in shared coverage.

A low value is not always a problem. Dedicated-customer or dedicated-site Operators may correctly work a narrow set of sites.

Read it with other metrics

- Unique Devices — distinguishes a small, device-dense assignment from a light workload.
- Alarms Handled — shows throughput across the sites.
- Avg. Processing Time — indicates how quickly the work was completed.

When to investigate

Review an Operator when Picked Sites is low relative to peers and Unique Devices and Alarms Handled are also low. Check whether the Operator is stuck, repeatedly assigned to the same site, or skipping cross-team coverage.
